

# SUCCESS STORIES

## THE STORY

The Plaza at Oceanside, a 17-story multifamily luxury tower of 40,000 square feet of indoor and outdoor location, confronted the challenge of providing seamless access to over 300 tenants across 11 doors. Their primary concern was implementing a versatile

access system, accommodating multiple credentials such as face recognition, key fobs, or smartphone access. Additionally, The Plaza sought a robust modern cloud-based system capable of adapting to future needs.

## CUSTOMER:

## SOLUTION HIGHLIGHTS: EMPOWERING SECURITY AND EFFICIENCY

The Plaza at Oceanside's solution addressed their access challenges with a forward-thinking approach. A comprehensive system allowed seamless access for over 300 tenants, supporting various credentials including face recognition, key fobs, and smartphone access. The implementation of a robust modern cloud system not only met their current needs but positioned The Plaza for future adaptability and scalability. The ability to visualize all access points in real-time from a single platform enhanced operational oversight, contributing to a more streamlined and efficient access management process. Furthermore, the deployment of weatherproof devices capable of operating in extreme humid conditions ensured the reliability and durability of the entire access control system, even in challenging environmental conditions. This comprehensive solution not only met The Plaza's immediate access needs but also future-proofed their operations, ensuring a seamless and secure experience for both tenants and management.
