

# SUCCESS STORIES

## THE STORY

Productive Playhouse, needed to secure office spaces in two locations in east and west coast, faced the challenge of managing operations across multiple sites. With nine doors to secure, their primary pain points included the need for seamless management of multiple locations through the internet on a single platform.

They sought a unified solution accommodating hybrid credential types, utilizing biometrics for secure spaces and card access for common areas.

## SOLUTION HIGHLIGHTS: EMPOWERING SECURITY AND EFFICIENCY

Productive Playhouse's solution addressed their diverse needs with a streamlined, unified approach. A centralized platform enabled seamless management of their two locations through the internet, providing a unified view for efficient oversight. The implementation of hybrid credentials, combining biometrics for secure spaces and card access for common areas, offered a flexible and secure access solution. To ensure transparency and accountability, the system incorporated detailed audit logs, allowing for meticulous tracking of credentials and changes made by local administrators within the platform. This comprehensive solution not only streamlined operations across multiple locations but also enhanced security measures, providing Productive Playhouse with a versatile and accountable access management system.
